JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY, VOLUME 214 (1986)

SUBJECT INDEX

Acid wash,
stability of titanium tubes towards ——— (Shams El Din et al.) 567
Alamethicin,
——— induced conductances in lipid bilayers. Part II. Decomposition of the observed (compound) process (Fleischmann et al.) 427
——— induced conductances in lipid bilayers. Part III. Derivation of the properties of the elementary process from the (compound) observed process (Fleischmann et al.) 441
Aminotrinitrobenzenes,
voltammetric and spectral study of some ——— and their radical anions (Constantinescu et al.) 213

Biomacromolecules,
adsorptive stripping voltammetry of ——— with transfer of the adsorbed layer (Paleček, Postbieglova) 359
Bismuth,
square-wave polarography of ——— (Lovrić, Branica) 103
Bismuth orthophosphate,
a phosphate-sensitive electrode based on ——— modified glassy carbon (Grabner et al.) 135
Bivalent cations,
the influence of electrostatic interactions on the binding of ——— to polynucleotides (Schuhmann, Kaba) 343

Cadmium,
electrochemistry of ——— ion at the water/nitrobenzene interface (Wang, Liu) 465
Square wave voltammetry — a rapid and reliable determination method of Zn, ———, Pb, Cu, Ni and Co in biological and environental samples (Ostapczuk et al.) 51
Carbon,
a phosphate-sensitive electrode based on $BiPO_4$-modified glassy ——— (Grabner et al.) 135
Electrochemical polarization of activated ——— and graphite powder suspensions. Part II. Exchange of ions between electrolyte and pores (Kastening, Spinzig) 295
Electrosorption of organics on three dimensional ——— fiber electrodes (Woodard et al.) 303
Catechol,
cathodic stripping voltammetry of ——— and some catecholamines (Kalvoda) 191
Charged interfaces,
voltammetric studies on the adsorption and association of cytidine dinucleotides in solutions of varying pH at ——— (Temerk, Valenta) 391
Chloride,
sodium perchlorate and ——— ion pairs (Pytkowicz) 519
Chromatophore membranes,
investigation of electrochemical double-layer effects on ——— of photosynthetic bacteria (Botte et al.) 407
Cobalt,
square wave voltammetry — a rapid and reliable determination method of Zn, Cd, Pb, Cu, Ni and ——— in biological and environmental samples (Ostapczuk et al.) 51
The influence of ultra-violet irradiation on the determination of nickel and ——— in natural waters by adsorption voltammetry (Bond, Luscombe) 21
Copper,
adsorption stripping square-wave voltammetry of ——— ions in the presence of thiourea (Yarnitzky, Schreiber-Stanger) 65
Binding of ———(II) and zinc(II) ions on various lignins (Kulik et al.) 331

Square wave voltammetry — a rapid and reliable determination method of Zn, Cd, Pb, ———, Ni and Co in biological and environmental samples (Ostapczuk et al.) 51
Copper–PDT complexes,
electrochemical properties of ——— (El Jammal et al.) 507
Coumarin,
phase transition processes displayed by ——— monolayers at the water–mercury interphase (Thomas et al.) 597
Current scanning,
cyclic voltammetry and chronopotentiometry with cyclic linear ——— of terramycin at the water/nitrobenzene interface (Wang, Liu) 459
Cyadox,
voltammetric determination of ——— using adsorptive accumulation in a flow-through system (Kopanica, Stará) 115
1,2-Cyclohexanedione,
polarographic reduction of aldehydes and ketones. Part XXVIII. ——— (Segretario et al.) 259
Cytidine dinucleotides,
voltammetric studies on the adsorption and association of ——— in solutions of varying pH at charged interfaces (Temerk, Valenta) 391

p-Dimethylaminobenzonitrile,
surface-enhanced Raman spectroscopy of ———: Field dependence and molecular orientation (Plieth, Förster) 675
Dimethylglyoxime,
electrochemical reduction of Ni(II) on the hanging mercury drop electrode in the presence of ——— (Pihlar et al.) 157
DNA,
electron exchange between mercury and denatured ——— strands (Barker) 373

1–1 Electrolytes,
conductance of ——— in methanol solutions from −45 to +25°C (Barthel et al.) 485
Electrostatic interactions,
the influence of ——— on the binding of bivalent cations to polynucleotides (Schuhmann, Kaba) 343
Entropic and enthalpic components,
——— of the symmetry factor for electrochemical proton transfer from various proton donors over a wide temperature range (Conway, Wilkinson) 633

Flow-through,
amperometric detection of nitrates using a ——— membrane detector (Trojánek, Opekar) 125
Voltammetric determination of cyadox using adsorptive accumulation in a ——— system (Kopanica, Stará) 115

Hydrogen,
determination of the kinetics of ——— evolution by analysis of the potential–current and potential–coverage curves (Divisek) 615
Effect of the oxygen layer at solid Ru electrodes on ——— oxidation in acid solution (Breiter) 547
The effects of anions on ——— electrosorption on platinum single-crystal electrodes (Markovic et al.) 555

Indium phosphide,
on the kinetics of electron transfer reactions at illuminated ——— electrodes (Tubbesing et al.) 685
Ion exchange,
electrochemical polarization of activated carbon and graphite powder suspensions. Part II. ——— between electrolyte and pores (Kastening, Spinzig) 295
Iridium dioxide,
surface properties of RuO_2 + ——— mixed oxide electrodes (Angelinetta et al.) 535

Ketones,
polarographic reduction of aldehydes and ———. Part XXVIII. 1,2-Cyclohexanedione (Segretario et al.) 259
Polarographic reduction of aldehydes and ———. Part XXVII. 1-Phenyl-1,2-propanedione (Segretario, Zuman) 237

Lead,
square wave voltammetry — a rapid and reliable determination method of Zn, Cd, ———, Cu, Ni and Co in biological and environmental samples (Ostapczuk et al.) 51
Lignins,
binding of copper(II) and zinc(II) ions on various ——— (Kulik et al.) 331
Linear sweep voltammetry,
comparison of ——— and staircase voltammetry using Walsh series (Seralathan et al.) 141
Lipid bilayers,
alamethicin induced conductances in ———

Part II. Decomposition of the observed (compound) process (Fleischmann et al.) 427
Alamethicin induced conductances in ———. Part III. Derivation of the properties of the elementary process from the (compound) observed process (Fleischmann et al.) 441

Mercury,
determination of ——— in sea water by stripping voltammetry (Gustavsson) 31
Electron exchange between ——— and denatured DNA strands (Barker) 373
Phase transition processes displayed by coumarin monolayers at the water–——— interphase (Thomas et al.) 597

Metahydroxybenzoic acid,
temperature dependence of the ionisation constants and evaluation of the related thermodynamic parameters for salicyclic acid and ——— (Struck et al.) 473

Methanol,
conductance of 1–1 electrolytes in ——— solutions from −45 to +25°C (Barthel et al.) 485

Microprocessor instrumentation,
pulse voltammetry and polarography. Recent progress in ——— (Tacussel et al.) 79

Mixed oxide electrodes,
surface properties of $RuO_2 + IrO_2$ ——— (Angelinetta et al.) 535

Natural waters,
the influence of ultra-violet irradiation on the determination of nickel and cobalt in ——— by adsorption voltammetry (Bond, Luscome) 21

Nickel,
electrochemical reduction of ———(II) on the hanging mercury drop electrode in the presence of dimethylglyoxime (Pihlar et al.) 157
Square wave voltammetry — a rapid and reliable determination method of Zn, Cd, Pb, Cu, ——— and Co in biological and environmental samples (Ostapczuk et al.) 51
The influence of ultra-violet irradiation on the determination of ——— and cobalt in natural waters by adsorption voltammetry (Bond, Luscombe) 21

Nitrates,
amperometric detection of ——— using a flow-through membrane detector (Trojánek, Opekar) 125

Nitrobenzene,
cyclic voltammetry and chronopotentiometry with cyclic linear current scanning of terramycin at the water/——— interface (Wang, Liu) 459
Electrochemistry of cadmium ion at the water/——— interface (Wang, Liu) 465

Oxygen,
effect of the ——— layer at solid Ru electrodes on hydrogen oxidation in acid solution (Breiter) 547
——— reduction on vacuum-deposited and adsorbed transition-metal phthalocyanine films (Van der Putten et al.) 523

Oxytetracycline hydrochloride,
an ultraviolet spectral and polarographic investigation of the acid–base and complexation behaviour of ——— (Buckley, Smyth) 199

Peroxomonosulphate ion,
recent thermodynamic data for some reactions of ——— (Balej) 481

Phase transition,
——— processes displayed by coumarin monolayers at the water–mercury interphase (Thomas et al.) 597

1-Phenyl-1,2-propanedione,
polarographic reduction of aldehydes and ketones. Part XXVII. ——— (Segretario, Zuman) 237

Photosynthetic bacteria,
investigation of electrochemical double-layer effects on chromatophore membranes of ——— (Botte et al.) 407

Platinum,
the effects of anions on hydrogen electrosorption on ——— single-crystal electrodes (Markovic et al.) 555

Polynucleotides,
the influence of electrostatic interactions on the binding of bivalent cations to ——— (Schuhmann, Kaba) 343

Propylene oxide,
the electrochemical production of ——— (Goodridge et al.) 283

Proton transfer,
entropic and enthalpic components of the symmetry factor for electrochemical ——— from various proton donors over a wide temperature range (Conway, Wilkinson) 633

Pseudo-polarography,
application of ASV for trace metal specia-

tion. Part VI. A computerized pseudopolarographic system (Branica, Pizeta) 95
Application of ASV for trace metal speciation. Part V. The ——— of zinc by RGCE (Komorsky-Lovrić et al.) 37
Pulse voltammetry and polarography,
———. Recent progress in microprocessor instrumentation (Tacussel et al.) 79

Rotating glassy carbon electrodes,
application of ASV for trace metal speciation. Part V. The pseudo-polarography of zinc by ——— (Komorsky-Lovrić et al.) 37
Ruthenium,
effect of the oxygen layer at solid ——— electrodes on hydrogen oxidation in acid solution (Breiter) 547
Ruthenium dioxide,
surface properties of ——— + IrO_2 mixed oxide electrodes (Angelinetta et al.) 535

Salicyclic acid,
temperature dependence of the ionisation constants and evaluation of the related thermodynamic parameters for ——— and metahydroxybenzoic acid (Struck et al.) 473
Sea water,
determination of mercury in ——— by stripping voltammetry (Gustavsson) 31
Sodium perchlorate,
——— and chloride ion pairs (Pytkowicz) 519
Staircase voltammetry,
comparison of linear sweep and ——— using Walsh series (Seralathan et al.) 141
Sulfones,
mechanistic studies on the electrosynthesis of ——— (Wille et al.) 221
Symmetry factor,
entropic and enthalpic components of the ——— for electrochemical proton transfer from various proton donors over a wide temperature range (Conway, Wilkinson) 633
Temperature dependence of the ——— in electrode kinetics (Bockris, Gochev) 655

Tellurium,
electrochemical reduction of ———(IV) (Sarala, Jayarama Reddy) 179
Terramycin,
cyclic voltammetry and chronopotentiometry with cyclic linear current scanning of ——— at the water/nitrobenzene interface (Wang, Liu) 459
Thiourea,
adsorption stripping square-wave voltammetry of copper ions in the presence of ——— (Yarnitzky, Schreiber-Stanger) 65
Three dimensional carbon fiber electrodes,
electrosorption of organics on ——— (Woodard et al.) 303
Titanium,
stability of ——— tubes towards acid wash (Sham El Din et al.) 567
Trace metal speciation,
application of ASV for ———. Part VI. A computerized pseudopolarographic system (Branica, Pizeta) 95
Application of ASV for ———. Part V. The pseudo-polarography of zinc by RGCE (Komorsky-Lovrić et al.) 37
Transition-metal phthalocyanine films,
oxygen reduction on vacuum-deposited and adsorbed ——— (Van der Putten et al.) 523
Triazolam,
polarographic behaviour and degradation studies of ——— (Viré, Patriarche) 275
Two-dimensional growth,
a computer simulation of ——— (Marner, Schmickler) 589

Ultra-violet irradiation,
the influence of ——— on the determination of nickel and cobalt in natural waters by adsorption voltammetry (Bond, Luscombe) 21

Walsh series,
comparison of linear sweep and staircase voltammetries using ——— (Seralathan et al.) 141

Zinc,
application of ASV for trace metal speciation. Part V. The pseudopolarography of ——— by RGCE (Komorsky-Lovrić et al.) 37
Binding of copper(II) and ———(II) ions on various lignins (Kulik et al.) 331
Square wave voltammetry — a rapid and reliable determination method of ———, Cd, Pb, Cu, Ni and Co in biological and environmental samples (Ostapczuk et al.) 51
